

ZANIER GLOVES COLLECTION 23 | 24.

Innovation, climate protection & passion for the outdoor experience.

CONTINUOUS DEVELOPMENT: THE CLIMATE PROTECTION MISSION.

Markus Zanier, CEO ZANIER GLOVES: "For me as an entrepreneur and father, climate neutrality is a human, not a strategic goal. That's why we have clearly made all our products and the entire company 100% climate-neutral right from the start - and not just individual processes or a capsule collection. The important thing now is to source further potential for avoidance and reduction - we've been working on this constantly since the first carbon footprint and certification as the first climate-neutral glove brand in 2019." The family-owned company's sustainability philosophy builds on the United Nations Sustainable Development Goals, is certified by Climate Partner, and is fully transparent to consumers through ZANIER's [Climate ID Tracking](#).

The most recent steps on the way to lower CO2 emissions are the conversion to e-mobility or at least hybrid of the entire vehicle fleet at the Innsbruck headquarters. In addition, the widespread use of the new PFC-free and bluesign® certified Gore-Tex insert with 100% recycled textile elements and improved ecological footprint is the next step towards CO2 reduction through the product itself. With sustainable Tirolwool®, loden from Austria and cork as natural materials as well as Sympatex®, Primaloft® and Polartec®, Zanier Gloves set the important course in the material sector years ago. Incidentally, the sustainability lead model was currently nominated with its third environmental award: After the Green Product Award and the Ispo Sustainability Award, the vegan outdoor glove BLEED X ZANIER was in the selection for the Austrian Sports Business Award Victor in the category Sport & Climate Protection.

THE ENGINE: INNOVATION.

Anyone who thinks that constantly reinventing the glove is impossible has been proven wrong by Zanier Gloves for decades: pioneer of heated gloves, gloves with GPS or pioneer of new materials and cuts. In October 2022, CEO Markus Zanier filed a patent for a product innovation on which he worked for nine months. The idea for a completely new cut came to him while descending in the cold after a demanding ski tour: ALPINE PRO GRIP.GTX is the glove solution for all mountain sports

BLEED X ZANIER is vegan and closes the recycling loop.

Glove rethought - the combination of finger glove and mitten has been filed for patent.

enthusiasts who want to combine the positive features of a mitten with those of a finger glove. The patented 3 Finger Grip cut keeps the hands pleasantly warm due to the optimal insulation of a mitten, while the indicated division of the fingers still offers an optimal grip feeling when handling. The ALPINE PRO GRIP.GTX is waterproof and windproof thanks to the new PFC-free GORE-TEX EPe membrane (bluesign®, Standard 100 by oeko-tex® certified, improved carbon footprint), also the leather used is PFC-free. The warm insulation is made of Tirolwool®, with 4-way stretch material for comfort and touch function, the model is a real comfort winner. The glove innovation was nominated for the Ispo Award and bears the Low Impact Icon of Zanier.

ALPINE PRO GRIP.GTX

BACKCOUNTRY HEAT.STX

First Mover 1999 in the heated glove segment & still unmatched: The Zanier Heat Technology.

THE ZANIER DNA: MOUNTAIN SPORTS PASSION.

Tyrol is the ideal place to develop professional mountain sports equipment. Gloves that accompany the Glockner mountain guides every day on the highest mountain in Austria perform in every situation to and on the mountain. The models for the Glockner mountain guides and the Mountain Rescue Tyrol also include the new 80° NORTH, a model with particularly warm, comfortable PrimaLoft® Down insulation for adverse temperatures and high cold sensations. With reflector print and leash the ideal companion for mountain sports.

80° NORTH

MIND THE GAP & STAY CLASSY OFF PISTE.

Whether with freeride skis, touring skis or board - the MYBACKCOUNTRY model is made exactly for that: Off Piste!!! The casual Zanier signature digital print on the leather backhand and palm is the eye-catching color variation. Valuable embroidery refines the look in all colors. Extra Long Powder Cuff prevents the "gap" between glove and jacket sleeve - so freeriders stay comfortably dry even when powdering. A removable merino liner allows practical layering. So the glove covers all temperature layers, the liner worn solo is practical for ski touring and fine motor handling.

MYBACKCOUNTRY

PROTECTION DOWN TO THE FINGERTIPS FOR NEW RACING ATHLETES.

The racing equipment leads Zanier Gloves this year for the first time over the big pond. US slalom talents Luke Winters, Ben Ritchie and Jett Seymour rely on X-TREME. XGX - a flexible, smart race model with paddings all over the upper hand. Durable waterproof with optimal tactility thanks to GORE-TEX with Gore Grip Technology. Backhand made of robust microfiber with casual camouflage print, palm made of high-quality, PFC-free leather for optimum grip. Comfortable neoprene wristband, practical leash lets the glove simply dangle from the wrist in warm weather.

X-TREME.XGX

THE ZANIER LADIES LINE.

Sporty fashion look and high comfort - the Zanier Ladies Line has always been known for style and function. Finger glove ARLBERG.STX made of soft 4-way stretch material and fine goatskin keeps dry with Sympatex® and warms ladies' hands all day long with ecological, soft Primaloft®. The extra-long powder cuff keeps dry even in snowfall and powder. The glove is particularly noble due to its cut and leather / microfibre combination, embossing and printing.

ARLBERG.STX

Since all products of the manufacturer from Tyrol are 100% climate neutral since 2019, particularly ecological models are additionally marked with the ZANIER Low Impact Icon, such as the lead model ZÜRS.GTX: The PFC-free Gore-Tex membrane is bluesign® and Standard 100 by oeko-tex® certified and has an improved carbon footprint. Of course, it still delivers the legendary durably waterproof, highly breathable and windproof Gore-Tex performance with the "Guarantee to keep you dry®" promise. The Primaloft Gold Eco insulation is made from 100% recycled fibers and stands for high warmth performance, even in wet conditions. The upper is made of recycled 4-way stretch material. The leather of the palm is also PFC-free.

ZÜRS.GTX

OUTDOOR ENTHUSIASM.

Vegan, climate neutral, recycled and recyclable - an outdoor glove as a sustainability statement. All materials of the BLEED X ZANIER are vegan and highly functional, the synthetic materials are also bluesign® and oeko-tex® certified. Made of Sympatex®, Polartec® fleece lining and robust cork material with the matching laser print "ACT NOW". The stylish print on the upper hand is water-based.

BLEED X ZANIER

The multifunctional outdoor glove Weisskugel has potential to become a year-round favorite of outdoor and mountain sports enthusiasts who care about sustainability: Schoeller® Bio Softshell combined with soft, warm Merino lining. For alpinists, the carabiner and the practical reflector print for safety at night are the appropriate features.

WEISSKUGEL

The Austrian Loden Glove stands for the heritage of Zanier Gloves. Original Austrian Loden in combination with goat leather for the palm and touch function to operate the mobile phone. That's all an elegant outdoor glove has to do to perform just as well on the mountain hut as in the city.

AUSTRIAN LODEN GLOVE

Outdoor.ws is a multifunctional glove that keeps you warm in the long term thanks to Windstopper® product technology. The pre-shaped cut and the cuddly knitted cuff with cork patch make the model the ideal, very comfortable companion for all sports to or on the mountain.

OUTDOOR.WS

KIDS & YOUTH LINIE.

Children's and youth's gloves must perform enormously throughout the day. The ZANIER Kids Line impresses with its waterproofness, warmth and protection – all day long. Just as important: Smart closure solutions and, of course, a look that is fun!

TWISTER

TWISTER. GTX is an eye-catching youth and children's model made of top materials, which is not easily lost due to the colour scheme. Waterproof by Gore-Tex, warm loft insulation and durable microfibre.

GRUMPY.STX

Model GRUMPY. STX with Sympatex® membrane and robust PU palm comes with a fun sequin embroidery on the back of the hand that can be changed. With Grumpy.stx, putting on gloves will certainly never be an issue again.

CUDDLY

The new CUDDLY also stands for warmth and protection, fun included! Comfortable 4-way stretch with funny animal motifs and cuddly fleece application on the upper hand. A fine, soft fleece liner and warm, cuddly loft insulation keep kids' hands nicely warm, while the fleece application on the cuff keeps the snow out. On the palm, the animal motif is repeated as outline embroidery.

Model **SKATER INFINIUM™** is insulated with windproof and highly breathable Gore-Tex Infinium™ Windstopper® product technology for pleasure cross-country skiers with lower activity levels. Both models have Amara palm and technical, reflective print, which is not only eye-catching, but also ensures greater safety during outdoor activities in the dark. The waistband solution is completely new: The knit waistband of both models is optimally adapted to the wrist thanks to a different, ergonomic structure, offering ultimate wearing comfort and even compression.

SKATER INFINIUM
