

ZANIER GLOVES COLLECTION 23 | 24.

Innovation, climate protection & passion for the outdoor experience.

CONTINUOUS DEVELOPMENT: THE MISSION OF CLIMATE PROTECTION.

Markus Zanier, CEO ZANIER GLOVES: "For me as an entrepreneur and father, climate neutrality is a human, not a strategic goal. That's why we have clearly made all our products and the entire company 100% climate-neutral right from the start - and not just individual processes or a capsule collection. The important thing now is to source further potential for avoidance and reduction - we've been working on this constantly since the first carbon footprint and certification as the first climate-neutral glove brand in 2019." The family-owned company's sustainability philosophy builds on the United Nations Sustainable Development Goals, is certified by Climate Partner and is fully transparent to consumers through ZANIER's Climate ID Tracking.

With sustainable Tirolwool®, loden from Austria and cork as natural materials as well as Sympatex®, Primaloft® and Polartec®, Zanier Gloves set the important course in the material sector years ago. In addition, the widespread use of the new PFC-free and bluesign® certified Gore-Tex insert with 100% recycled textile elements and improved ecological footprint is the next step towards CO2 reduction by the product itself. Incidentally, the sustainability lead model was currently nominated for its third environmental award: After the Green Product Award and the Ispo Sustainability Award, the vegan outdoor glove BLEED X ZANIER was shortlisted for the Austrian Sports Business Award Victor in the category Sport & Climate Protection.

THE ENGINE: INNOVATION.

Those who believe that constantly reinventing the glove is impossible have been proven wrong by Zanier Gloves for decades: pioneer of heated gloves, gloves with GPS or pioneer of new materials and cuts. In October 2022, CEO Markus Zanier filed a patent for a new product, which he worked on for nine months. The idea for a completely new cut came to him while descending in the cold after a demanding ski tour: ALPINE PRO GRIP.GTX is the glove solution for all mountain sports enthusiasts who want to combine the positive properties of a mitten with those of a finger glove. The patented 3 Finger Grip cut keeps the hands pleasantly warm thanks

ALPINE PRO GRIP.GTX

The glove redesigned - this combination of finger-glove and mittens has been patented.

to the optimal insulation of a mitten, while the indicated division of the fingers still offers an optimal grip feeling when handling. The ALPINE PRO GRIP.GTX is waterproof and windproof thanks to the new PFC-free GORE-TEX EPe membrane (bluesign®, Standard 100 by oeko-tex® certified, improved carbon footprint), and the leather used is also PFC-free. The warm insulation is made of Tirolwool®, with 4-way stretch material for comfort and touch function, the model is a real comfort winner. The glove innovation was nominated for the Ispo Award and carries the Low Impact Icon by Zanier.

THE ZANIER HEATING TECHNOLOGY.

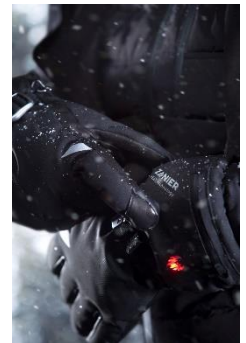

As early as 1999, ZANIER pioneered the development of the first heated gloves, which for over 20 years now have enabled cold-sensitive people and even patients with Raynaud's syndrome to enjoy carefree outdoor experiences in winter. The unique control electronics heats on three levels for up to 10 hours, the included charger recharges the 60g light lithium-ion batteries overnight. 4 different models heat up winter sports enthusiasts even 23/24: The classic finger glove HEAT.STX, the HOT.STX mitten, which is particularly popular with women, the aviation model AVIATOR.GTX and the BACKCOUNTRY HEAT.STX with the typical freeride lobster cut.

THE ZANIER DNA: MOUNTAIN SPORTS PASSION.

Tyrol is the ideal place to develop professional mountain sports equipment. Gloves that accompany the Glockner mountain guides to Austria's highest mountain every day perform in every situation to and on the mountain. The models for the Glockner mountain guides and the Mountain Rescue Tyrol also include the new 80° NORTH, a model with particularly warm, comfortable PrimaLoft® Down insulation for adverse temperatures and high sensitivity to cold. With reflector print and leash, the ideal companion for mountain sports.

BACKCOUNTRY HEAT.STX

First mover 1999 in the heating glove segment & still unmatched: Zanier's Heat Technology.

80° NORTH

ALPINE GLOVES. MIND THE GAP & STAY CLASSY.

ZENITH.GTX is a full-leather mitten with a stunningly soft feel, which is also available in finger glove and trigger versions. GORE-TEX with Gore-Active technology keeps hands dry and is particularly breathable. LOFT is a synthetic, soft and warm insulation material that draws moisture away from the hands. The palm with PU patch and silicone print provides grip. The neoprene cuff ensures an ideal fit and disappears right under the jacket cuff where snow can penetrate in extreme cases.

ZENITHX.GTX

RACING GLOVES: PROTECTION RIGHT DOWN TO THE FINGERTIPS.

This year, the racing equipment takes Zanier Gloves across the pond for the first time. US slalom youngsters Luke Winters, Ben Ritchie and Jett Seymour rely on X-TREME.XGX - a flexible, smart race model with paddings all over the backhand. GORE-TEX with Gore Grip technology ensures lasting waterproofness and optimum tactility. Backhand made of robust microfibre with casual camouflage print, palm made of high-quality, PFC-free leather for optimum grip. Comfortable neoprene wristband, practical leash lets the glove dangle easily from the wrist in warm weather.

X-TREME.XGX

THE ZANIER LADIES GLOVES.

Sporty fashion look and high comfort - the Zanier Ladies Line has always been known for style and function. Finger glove ARLBERG.STX made of soft 4-way stretch material and fine goatskin keeps dry with Sympatex® and warms ladies' hands all day long with ecological, soft Primaloft®. The extra-long powder cuff keeps dry even in snowfall and powder. The glove's cut and leather / microfibre combination, embossing and print make it particularly classy.

ARLBERG.STX

Since all products of the manufacturer from Tyrol are 100% climate neutral since 2019, particularly ecological models are furthermore marked with the ZANIER Low Impact Icon, like the lead model ZÜRS.GTX: The PFC-free Gore-Tex membrane is bluesign® and Standard 100 by oeko-tex® certified and has an improved carbon footprint. Of course, it still delivers the legendary durably waterproof, highly breathable and windproof Gore-Tex performance with the "Guarantee to keep you dry®" promise. The Primaloft Gold Eco insulation is made from 100% recycled fibres and stands for high warmth performance, even in wet conditions. The upper is made from recycled 4-way stretch material. The leather on the palm is also PFC-free.

ZÜRS.GTX

OUTDOOR GLOVES & OUTDOOR ENTHUSIASM.

Vegan, climate neutral, recycled and recyclable - an outdoor glove as a sustainability statement. All materials of the BLEED X ZANIER are vegan and highly functional, the synthetic materials are also bluesign® and oeko-tex® certified. Made of Sympatex®, Polartec® fleece lining and robust cork material with the matching laser print "ACT NOW". The stylish print on the backhand is water-based.

BLEED X ZANIER

The multifunctional outdoor glove WEISSKUGEL has the potential to become a year-round favourite of outdoor and mountain sports enthusiasts for whom sustainability is important: Schoeller® Bio Softshell combined with soft, warm Merino lining. For alpinists, the carabiner hook and the practical reflector print for safety at night are just the right features.

WEISSKUGEL

The AUSTRIAN LODEN GLOVE represents the heritage of Zanier Gloves. Original Austrian loden in combination with goatskin for the palm and touch function for operating the mobile phone. That's all an elegant outdoor glove needs to do to perform just as well on the alpine hut as in the city.

AUSTRIAN LODEN GLOVE

OUTDOOR.WS is a multifunctional glove that keeps you warm over the long term thanks to Windstopper® product technology. The pre-shaped cut and the cosy knitted cuff with cork patch make this model the ideal, very comfortable companion for all sports to or on the mountain.

OUTDOOR.WS

CHILDREN & YOUTH GLOVES.

Kids and youth gloves have to deliver enormous performance all day long. The ZANIER Kids Line convinces with waterproofness, warmth and protection - all day long. Just as important: smart closure solutions and of course a look that's fun!

TWISTER.GTX is an eye-catching youth and children's model made from top materials that won't easily get lost, thanks to the colour scheme alone. Waterproof thanks to Gore-Tex, warm loft insulation and durable microfibre.

TWISTER

Model GRUMPY.STX with Sympatex® membrane and robust PU palm comes with a funny sequin embroidery on the back of the hand that can be changed. With Grumpy. stx, annoying wearing gloves will surely never be an issue again.

GRUMPY.STX

Also the novelty CUDDLY stands for warmth and protection, fun included! Comfortable 4-way stretch with funny animal motifs and cuddly fleece application on the upper hand. A fine, soft fleece liner and the warm, cosy loft insulation keep children's hands nice and warm, the fleece application at the waist keeps the snow away. The animal motif is repeated on the palm as an outline embroidery.

CUDDLY

NORDIC GLOVES.

Model **SKATER INFINIUM™** is for pleasure cross-country skiers with a lower level of activity. The windproof and highly breathable Gore-Tex Infinium™ Windstopper® product technology is ideal for this. With Amara palm and technical reflective print for more safety when outdoor activities in the dark. The waistband solution is innovative: the knitted waistband is optimally adapted to the wrist thanks to its different, ergonomic structure, offering ultimate wearing comfort and even compression.
